

Environmental Protection Policy

Taiwan Cement Corporation upholds the beliefs of sincerity, confidence, diligence, and responsibility, continuing to carry out each and all pollution prevention and improvement tasks so as to achieve the idea of co-existence, mutual prosperity, and sustainable development between the enterprise and the natural environment.

In order to achieve the goal that all employees and external stakeholders have “quality life,” under the Environment, Safety, and Health Management Promotion Committee convened by the Chairman and the President, the representatives of the management will supervise relevant units to frame, promote, and maintain relevant environmental management systems and specific action plans. In addition to integration of environmental protection into operational ideas and establishment of the environmental self-management system based on full participation, the Company’s Environmental Protection Policy is hereby stipulated as a doctrine of compliance by all internal and external personnel.

The Company declares its Environmental Protection Policy as follows:

1. Compliance with laws and regulations: Comply with domestic laws and regulations in respect of environmental protection and other relevant requirements.
2. Full participation: Implement environmental protection educational training and drive all employees to participate in the environmental protection management system.
3. Green consumption: Follow the international trend of environmental protection, strengthen source reduction of wastes and resource recycling, promote green product procurement, use “low-polluting, recyclable, and resource-conservative” products, reduce damage to the environment, and diligently practice waste reduction and resource reuse.
4. Continued improvement: Self-assess the outcome and achieve continued improvement of the management system via differentiation in consideration of the environment, establishment of review targets, implementation of environmental management projects, and recurring practice of audit tasks.
5. Well-arranged communications: Timely convey and publish our Environmental Protection Policy and relevant requirements to all stakeholders of the Company so as to demonstrate our determination to improve the environment.
6. Performance upgrade: Go clean production, utilize pollution prevention and control technology, and upgrade environmental protection performance.
7. Sustainable operation: Accumulate and develop practical experiences in respect of environmental protection so as to ensure that the Company and its clients and contractors can maximize their benefits and achieve the goal of sustainable operation.
